

Dynamic Leverage and High Margin Requirements(HMR) Terms&Conditions

Terms&Conditions

These are the terms and conditions ("Agreement") governing the leverage trading services provided by WeTrade ("the Company") to its clients ("Clients or Users"). By using the leverage trading services provided by the Company, Users agree to be bound by the following terms and conditions:

1.Leverage Trading Services:

1.1 The Company offers leverage trading services that allow clients to open larger positions with a smaller amount of capital.

1.2 The use of leverage trading services is subject to the client meeting the eligibility criteria determined by the Company, including but not limited to age, jurisdiction, and other requirements as specified by applicable laws and regulations.

2.Risks and Awareness:

2.1 Clients acknowledge and understand that leverage trading carries high risks, including the potential for significant financial loss.

2.2 Clients agree to independently assess their financial situation and the risks associated with leverage trading. The Company shall not be held liable for any losses incurred by the client.

3.Margin Requirements and Liquidation:

3.1 Clients agree to maintain the required margin as determined by the Company to support their leverage trading.

3.2 If client fail to maintain the required margin, the Company may, at its sole discretion, liquidate the client's leverage trading positions. Clients acknowledge and understand that such liquidation may result in financial losses.

4.Dynamic Leverage:

4.1 Dynamic leverage is applicable to Forex and Precious Metals (Gold and Silver) products.

4.2 The leverage for Spot Metals is always half of the Forex leverage.

4.3 Dynamic leverage does not apply to Indices, Stocks, Cryptocurrencies, and Energy products.

Terms&Conditions

5.Triggers for Dynamic Leverage:

Changes in account equity.

6. Explanation of Dynamic Leverage:

Please refer to the provided "Account Equity" for details.

Forex	Metals	Equity (USD)
2000	1000	0-999.99
1000	500	1000-4999.99
500	250	5000-49999.99
400	200	50000-499999.99
200	100	≥500000

7. High Margin Requirements (HMR):

In specific scenarios, such as trading before weekends and holidays, as well as during the release of important economic news, higher margin requirements will be implemented for new opening trades or re-opening trades resulting from closing positions.

7.1 Market Closure and Reopening (Weekends, Holidays):

7.1.1 Within the last 3 hours before market closure on weekends (holidays), all new opening orders will be subject to maximum leverage of 1:200 for Forex and 1:100 for Precious Metals.

7.1.2 One hour after the market reopens following weekends (holidays), the high margin requirements will be lifted, and the margin will be recalculated based on the net value of the trading account and the set leverage.

Terms&Conditions

7.2 News Releases:

7.2.1 For specific trading instruments affected by significant news releases, within 15 minutes before and 5 minutes after the release, the maximum available leverage will be 1:400 for Forex and 1:200 for Precious Metals.

7.2.2 After the news release period, the high margin requirements will be lifted, and the margin will be recalculated based on the net value of the trading account and the set leverage.

7.3 Hedging Orders during HMR Period:

7.3.1 If a hedging order is closed, resulting in an unhedged position, the unhedged position will be treated as a new opening order. Therefore, the margin for this order will be calculated based on the increased margin requirements.

7.3.2 If a hedging lock is applied to orders placed before the margin requirement increase, the fully hedged portion will have zero margin requirements. However, any remaining unhedged position will be calculated based on the margin requirements before the increase.

7.4 Cases not Subject to Dynamic Leverage but Still Subject to High Margin

Requirements:

7.4.1 Accounts with a leverage ratio $\leq 1:400$ will not be affected by the fluctuating margin requirements during news periods. Similarly, accounts with a leverage ratio $\leq 1:200$ will not be affected by fluctuating margin requirements during weekends and holidays. For example, during news periods, an account with a 1:100 leverage will still be subject to a margin requirement of 1:100.

7.4.2 Accounts with a margin level $< 200\%$ or those that have selected a fixed leverage will not be affected by dynamic leverage.
